## **DETAILED ACTION**

### ***Drawings***

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because in ((figure 3, squares 10, 3, 4, 1) (figure 4, square 21, 40, 41 and circles 3 and 20) (figure 6, squares 21, 42, 43 and circle 3) (figure 11, squares 100, 101, 102, 103) (figure 8, squares 21, 6, 42, 43, 40, 41 and circle 20, 3, 30) (figure 9, box 1)) must label. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Figure 1 and 2A-2C should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

The disclosure is objected to under 37 CFR 1.71, as being so incomprehensible as to preclude a reasonable search of the prior art by the examiner. For example, the following items are not understood: in [0040] discloses "the invention is directed to emulate the current IL in the

inductor L and to use the emulated current IE to switch off the switch CF”, which does not corresponding to the disclosure of figure 3. (i.e. figures 3 and 4 shown the emulator circuit operated in a close loop manner. It is unclear in figures 3 and 4 how the emulated current IE to switch off the switch CF as described in [0040].

Applicant is required to submit an amendment which clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

### ***Claim Rejections - 35 USC § 101***

Claims 1-12 rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. The claim invention directed to a close loop circuit as shown in (i.e. figures 3), it appeared that the circuit is endless looping, since CS is compared by comparator 3 with IE then outputted E signal to a generator controller 4 that outputted VD to a generator for generating an emulated signal based on timing information, then it start again by compare the CS by the comparator 3 with IE...It shown no output signal and when the close loop circuit stop performing the function to generate the emulated signal.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

Art Unit: 2838

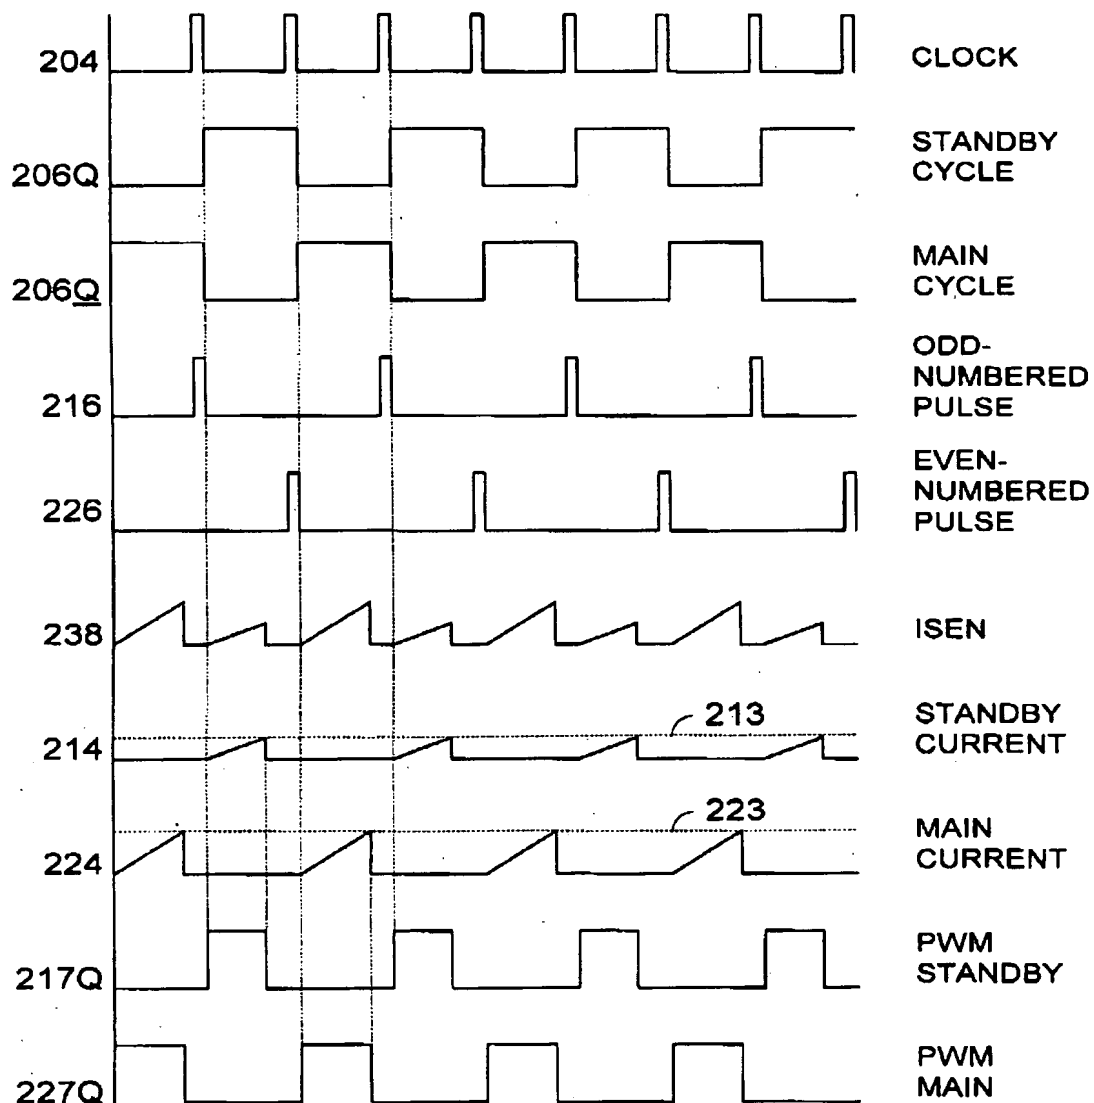

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 1-12** are rejected under 35 U.S.C. 102(b) as being anticipated by Liu (US 5999421).

**Regarding claims 1-12:** for the purpose of examination the Examiner interpreted the claims as shown in figures 4 and 5. Therefor claims 1-12 are rejected under figures 4 and 5 see below.
